*I'm a Front End Developer and Designer.*

*I'm a troubleshooter, a problem solver. I'm a photographer who has spent the greater part of a decade honing my skills in the fashion and music worlds. Not one to be idle, I'm also a web designer, project manager and film maker. I can handle all facets of the digital world. From the back and front end of a website, photographs, film to graphics. I have worked closely with many clients, most notably the Bicycle Film Festival, exercising and honing all of these skills. In the process developing relationships and leading to new clients and creative partnerships.*

*I grew up by the beach in Queensland but have been living and working in New York and Montreal for the past 6 years. When I'm not working, I'm at the beach. Although often, when I'm at the beach I'm still working. The dichotomy of big city and small coastal town is reflected in my easy going, yet driven personality. If I have my laptop and camera, I can create anything. Everyday is an adventure!*

## SKILLS

*Extensive knowledge of Adobe Creative Suite 6.  
Apple Mac Hardware running OS X Mavericks.  
I have a range of transferable skills that include:- Commercial Photography, Graphic Design, Website Design, Interface Design, Cinematography, Film Editing and a strong understanding of HTML, CSS, Javascript, jQuery, E-commerce, SEO, Wordpress, Shopify, Mailchimp and Social Media.*
